

Would your family benefit from an Autism Assistance Dog?

Autism Assistance dogs are extensively trained to enhance the well-being of children and families living with Autism. Our dogs provide trained tasks both in public and at home to assist with keeping children grounded and focused while presenting a social bridge for relationships and friendships.

HOW AUTISM ASSISTANCE DOGS HELP

- Helps redirect the child's focus off stimuli in the environment
- Increases confidence and enhances engagement in daily activities and therapies
- Offers steady and reassuring companionship
- Provides deep pressure to reduce anxiety and promote relaxation
- Creates opportunities as a social bridge

Autism Assistance Dogs are provided to our clients at zero cost thanks to donor support. We are currently serving children between the ages of 4-12 in select states
