

## Are you missing important sounds?

Learn how  
Hearing Assistance  
Dogs help

Dogs for Better Lives' Hearing Dogs are trained to alert to specific household sounds by making physical contact with their handler and leading them to the sound. Sounds like a smoke alarm, oven timer, name call, baby cry, door knock, phone, and alarm clock are commonly trained by our professional trainers.

### HOW HEARING ASSISTANCE DOGS HELP

- **Safety:** Prompt alerts to essential household and public sounds such as smoke alarms, baby cries, or someone calling your name.
- **Independence:** Assistance in navigating everyday environments with confidence.
- **Companionship:** A trusted partner dedicated to improving quality of life.
